Hammer commences Exploration Drilling of Mount Isa Copper Gold Targets

Advanced explorer, Hammer Metals Limited (Hammer) (ASX: HMX) announces that it has commenced a new RC drilling programme of approximately 2000 metres. The drilling will test several of the Company's Copper and Gold targets within the Mt Isa project hub.

Some of the targeted areas include:

- Dronfield
- Even Stephen
- Trafalgar North
- Hammer Time
- Overlander Central
- Kalman extensions
- Pindora South

All targets listed may not be tested in this programme, depending on but not limited to weather and access conditions. It is expected that drilling will continue for approximately one month, with assays to follow shortly thereafter.

The programme is to explore for further high grade Copper and Gold targets within close trucking proximity of Hammer's Kalman deposit.
